A New Pellet Stove

In 3 Easy Steps

1. Choose your Stove
2. Select your Venting
3. Purchase your Hearth Pad

Venting/Hearth Pad

Outside Air Kit

- Required for all mobile and manufactured housing or if there is a question of negative pressures in the home. Just connect to the unit.

- Rear vent with shield & clean out door

- For best connections for no leak vent connections and quick and easy vent cleaning.

- Short vent 90 degree with the clean out

- For the situation of close encounters and quick and easy vent connections, with the same easy clean door.

- Rear vent adapter with clean out door

- Care-free vent connections with no leak worries and easy cleaning with vent clean out door.

- Vent adaptor 3” - 4” offset

- The standard 3-inch outlet from the unit can easily be adapted for 4-inch venting for your situation.

- Top flue adaptor 3” - 6”

- Connecting the standard 3-inch unit outlet to an existing 6-inch stove pipe will quickly connect and seal with no worries.

- Hearth Pad

- Hearth pads are designed to protect existing flooring and must be used when installing a stove onto combustible flooring.
Value & Dependability
The Eco-Choice Advantage

Heatilator® Eco-Choice™ pellet stoves combine dependability and value from a brand you know and trust for hearth products. Featuring simple technology that’s easy to operate and maintain, Heatilator Eco-Choice stoves provide clean and efficient heat. With a simple design plus quality you can see and feel, these freestanding stoves will deliver warmth and comfort in any room.

Easy to use and maintain
Eco-Choice pellet stoves have large hoppers to hold plenty of fuel, include large ash pans and a fully-opening firepot bottom for easy maintenance.

It’s a Heatilator
Manufactured in the USA, by the world’s leading hearth company since 1927- known for value and dependability.

Save money while being green
Reduce your heating bills and live green by utilizing renewable fuels. Pellet fuel is the cleanest burning biomass fuel available.

PS35 pellet-burning stove
- 12,900-34,000 BTU/hr Input¹
- 1,500-2,000 sq. ft. heating capacity²
- 78% efficient³
- Thermostat-controlled auto-ignition
- 1 bag hopper
- Mobile home approved

PS50 pellet-burning stove
- 16,300-43,000 BTU/hr Input¹
- 1,800-2,500 sq. ft. heating capacity²
- 78% efficient³
- Thermostat-controlled auto-ignition
- 3 bag hopper
- Mobile home approved

CAB50 pellet-burning stove
- 16,300-43,000 BTU/hr Input¹
- 1,800-2,500 sq. ft. heating capacity²
