

# QUARTZ SERIES

Direct Vent Gas Fireplaces

# THE FEATURES YOU NEED, WITH THE OPTIONS YOU WANT.

Quartz 32 shown with contemporary conversion kit and Black Glass liner

## Quartz Series Direct Vent Gas Fireplaces

The Quartz series gas fireplaces have the features you need, with the options you want. The shallow depth leaves you with living space to spare, while the versatile interior can be changed from traditional to contemporary to fit your style.

Cover photo: Quartz 36 shown with Tavern Brown interior

### Quartz Quick Look

- Shallow depth allows for more installation possibilities
- Customize the interior with traditional or contemporary features
- Create a contemporary look now or later
- Available in 32" or 36" models
- Up to 24,000 BTUs

# ACCESSORIES FOR YOUR QUARTZ FIREPLACE

**Interior Panel Options** – Customize the interior of your fireplace with this alternative style of decorative lining.

Cottage Red

Tavern Brown

Reflective Black Glass

**Contemporary Conversion Kit** – Includes Diamond and Onyx glass and stone kit.

Diamond Glass

Onyx Glass

Stone Kit

**Glass Firebed** – Accent your flames with modern crushed glass. Make it your own with several color options.

Diamond Glass

Onyx Glass

Sapphire Glass

Bronze Glass

**Controls** – Take complete control of your comfort.

### SmartRemote

An added level of function and convenience in a remote control, with battery-powered receiver, timer mode, thermostat mode, room temperature readout, on/off.

### TotalRemote

Effortlessly manages heat output and comfort level, with timer mode, thermostat mode, room temperature readout, flame high/low, fan speed, on/off.

### Additional Options Not Pictured

- Fan kit extends the heating range of your fireplace.
- A selections of mantels, surrounds, and shelves available at [MajesticProducts.com](http://MajesticProducts.com).

**Heat Management** – Technologies to help you manage the heat throughout your house.

### Power Venting Technology

Fireplaces aren't just for exterior walls. A fan-powered accessory with slim venting can zigzag throughout your home—up, down, over or under – making it possible to install a gas fireplace virtually anywhere. This ensures safe fireplace operation and the best flames. Check with your local hearth professional to determine if your home or fireplace could benefit from power venting technology.

### Heat Duct Technology

Brings the warmth from your fireplace to the rest of your home, by redistributing heat from the fireplace via the furnace ductwork. When a heat duct is run continuously, it can redirect up to 25% of the heat to another area, thus reducing wall temperatures above the fireplace. Two heat ducts run continuously will redirect up to 50% of the total heat output.

### Heat Zone Technology

Draw heat from your fireplace to another room in your home, up to 20 feet away. When a heat zone kit is run continuously, it can redirect up to 25% of the heat to another area, also reducing wall temperatures above the fireplace. Two heat zones run continuously will redirect up to 50% of the total heat output.

## IntelliFire™ Ignition System

An advanced intermittent pilot ignition system. IPI constantly monitors ignition, ensures safe functioning and conserves up to \$10/month in energy costs.

## Direct Vent Technology

Direct Vent fireplaces remove 100% of combustion exhaust and odors from your space. These sealed fireplaces provide optimal heat, conserve energy and ensure clean indoor air quality.

## U.S. Efficiencies

### Steady State

Since most homeowners use their fireplaces for an extended time while they are in the room, Steady State measures how efficiently your fireplace converts fuel to heat once it is warmed up and running in a "steady state".

### AFUE

AFUE rating is more typically used with appliances, like your furnace, that continually cycle on and off to maintain a constant temperature.

## Canada Efficiencies

### EnerGuide (CSA P.4.1-15)

EnerGuide is the official Government of Canada mark associated with the labelling and rating of the energy consumption or energy efficiency of specific products.

RATING	QUARTZ 32	QUARTZ 36
Steady State	66.8% (NG) 66.8% (LP)	63.9% (NG) 63.9% (LP)
AFUE	53.0% (NG) 57.7% (LP)	53.0% (NG) 54.9% (LP)
EnerGuide (CSA P.4.1-15)	56.0% (NG) 54.1% (LP)	50.7% (NG) 51.1% (LP)
